## AN ODE

### To The Memory of a Departed Friend.

Days, months, and years have passed away  
Since thy dear form held its sway  
How often I visit the old home place  
Where I have been greeted by thy sweet face  
Often in the family room in your accustomed place  
I have gazed upon a younger face,  
And now I can safely agree with you  
I will never give an old friend for a new.

Even down in the old dining place  
Where we have sat so often face to face,  
Enjoying the good things of life  
Prepared by our own hands, a most noble housewife,  
Even out on the little side porch a lovely vine  
Where thy own fingers taught it to twine.  
How lonely I feel, when it I view  
And then I remember never to give an old friend for a new.

Just as the rose slips the dew  
So I think the fond memories of you,  
Though your seraph like spirit has gone to dwell  
In immortal glory, that no longer can tell  
Welcomed by those who have gone before  
Many whom you have mingled with in days of yore  
Relieved from care and sorrow by a Savior so true,  
Saying as you met his embrace, never give an old friend  
for a new.

Thy works and deeds still live here  
A living monument o'er which we shed a tear  
Doing acts of kindness, both to rich and poor  
Your kind advice I can never ignore  
But dear friend my loss has been your gain,  
Yet some golden day I hope to meet thee again  
God grant it may be never to say adieu  
For I have never given up an old friend for a new.

Mrs. J. A. McQuady.

## CUBAN SIGHTS AND SCENES.

Pinar del Rio, Cuba, March 20, 1899.

TO THE BACKSIDE NEWS.—For the sake of those who wish to seek their fortune on the island of Cuba, I will endeavor to write you a few lines.

As you all know a soldier has very little time for this sort of work and, therefore, you will not expect everything to be in detail.

The most important industry of the island is farming. Instead of the improved implements, which the Americans would be lost without, the Cubans have a rude sort of plow and a short handle hoe. The plow is indeed a curiosity. The stock and handle are one piece of wood. The stock being the handle and the handle the shaft of a tree. The branch is turned down so as to make a good handle and the body, which is only about a foot and a half long, is turned so as to run parallel to the ground. It has a piece of iron fixed over the end to protect the point from the rocks. The beam is nothing more than a long pole mortised into the handle near the stock and is as long as an ordinary wagon tongue. The hoe is made something like the American hoe, but the handle is never more than three feet in length.

Instead of the big fine horses and mules to work they have oxen, which do all plowing, hauling and such like that is to be done. Their yokes, instead of being fastened with a bow as is work against the shoulder, are fastened to the top of the head by rope around the horns. To the American this seems to be a very curious way to yoke them, but because they have no way at all to protect themselves against the insects which bother them.

Nearly everything is planted in large ridges of hills. Even tobacco, which is the most important crop, is planted in small ridges. They grow two or three crops on the same piece of ground the same year.

Every farmer has his little banana grove and two or three coconut trees near his house. Sweet potatoes, onions and, to some extent, almost every tropical fruit that can be named are raised.

As for cultivation the Cuban does very little. They just plant their crops, keep the largest weeds out and trust to the soil. If an American could only stand the climate during the rainy season, set a good farm and cultivate it as he would a farm in the States it is a pretty sure thing that he would soon be an independent man. The soil is good and all it needs to make it bring up the results is to have some one to work it that knows something about it.

The crops are either taken to market on large, awkward looking carts drawn by oxen, or on pack trains. The carts are large and roughly built; but it is astonishing what loads can be hauled upon them. The wheels are from six to eight feet in diameter and the beds are a great deal larger than ordinary wagon beds. These beds are filled with whatever they happen to be hauling and if one yoke of oxen can't pull it they hitch two or three more. The oxen are hitched close to the load, just as we do, excepting the lead yoke which is sometimes hitched fifty feet in advance of the others. This is done so when going over the low ridges when the oxen go to the steep part of the hill the ad-

vanced yoke will be over the hill far enough to get a good foot hold. The oxen are driven with long rods or "back breaks" in one end, rather than the whip.

Carts are used on good roads and where the distance is not too great; but where there is any mountain to go over or the distance is very great they use the mule trains. These little "trabucos," as they would be called in America, can carry some tremendous loads. There is generally one mule in the bunch that can be trusted as a leader. On his hip placed a bell and when he starts all follow in his trail. If there happens to be some in the train that do not want to follow their leader he is tied to the backs of the leaders and then it is a case of have to go or stop the whole train. The pack trains are indispensable on account of the people of the interior getting their goods to and from market.

The railroads are few and far between both in number and in quality. It is a very hard matter to find a cushion-seated coach and when you do if you want to ride in it you only have to pay about ten cents per mile to do so.

Then after finding a coach that is half way comfortable, if you don't mind the train will be a mixed one of freight and passengers.

Lumber in Cuba is very scarce. On the mountain ebony, mahogany and rosewood are to be found; but on the plains the royal palm is the only tree of any importance. These trees are indispensable. From the body the natives get their timber for different purposes. From the leaves they get the covering for their houses. From the fruit they get the meat for their hogs, and from that part of the tree under the tender bark their is a substance on which the natives themselves can live. Nearly all the country houses and barns are built of palm leaves, with the sides weatherboarded with the bark from the same tree. All the towns and some few country houses are built of brick, plastered inside and out. They have to be plastered outside to protect them from the beating rains. The roofing is all tiled and a person that has never seen it has no idea what a beautiful sight it is to get on an elevated place and look over the roofs of the houses of a small town. Nearly all the houses in town are built with an inner court, which is nearly always lined with some of the prettiest tropical flowers that can be found.

There is just a few streets in any town that are parallel, and a still fewer number that are straight for a greater distance than a hundred yards. Good roads are very few, but if they were worked upon by the proper kind of people they could soon be made as good as the roads in any country. To prove that the roads can be made good they have a few government roads which are as good as can be found anywhere.

The strata in the mountains lay at an angle of about forty-five degrees. It is very easy to ascend them if you go up from the right side, but if you try to ascend from the opposite side it is almost impossible. It is a beautiful sight to get on these mountains and look out over the rolling plains, which stretch far beyond the view of the naked eye. Some of the prettiest scenery that I have seen is to be found anywhere in the foot-hills of these mountains.

The people are hard to fool on goods of any kind and if an American wants to do business in this country he had better learn the value of their money or they will cheat him out of everything he has. They have a very peculiar looking coat they wear, which looks more like a shirt from the front than it does like a coat. Hats for women are very hard to find because they rarely ever wear them except when out driving.

Let me say in conclusion, if any of my friends wish to come to this country they must let strong drink alone, and eat very little fruit with the exception of oranges, which are prescribed by the doctors to be as healthy as any thing that can be found on the island.

Very respectfully,

## SAVED BY A LIE.

CLARENCE MILTON HAMMOND.  
MILLS & BANGS were in a bad way. Mills & Son had built a big, new mill and fitted it out with the very latest pattern of machinery a year before, and they were producing woodwork for 20 per cent. less than Mills & Bangs. "Shoddy," so the salesmen of the old firm told the trade, but the trade wanted low-priced goods to sell at a profit.

"We don't want stuff that will wear forever," said the trade. "Give us something that looks good, and when it wears out it will set back to you through the ragmen, and you can grind it up again and mix some new wool and a good deal of cotton with it. Weave it into new designs and we'll sell it again for you."

Mills & Bangs didn't want to do this. In the first place, Bangs was superintendent of a Sunday-school and had very strict notions about the amount of shoddy that should go into woens on which his name was put. Besides, the mill and the mill in their mill was of-fashioned and slow, and required half as many of men and women and boys as the more modern plant of Mills & Son.

So things grew worse and worse with the old firm. They ran full time till they were hopelessly overstocked. They laid off help they cut wages, and then ran first on two-thirds and then on half-time. The reserve capital of the firm was used up; the bank balance was drawn down to a few thousand dollars and reports from salesmen in the West and South were as bad as possible.

Then Mills and Bangs held an executive session and John Mills stated the condition of affairs to his partner very plainly.

"We have got pretty near to the end of our rope, Henry, unless we can raise a hundred thousand dollars at once with which to put in new machinery we're done for. How can we raise it?"

Henry Bangs knew about as much how to raise \$100,000 as he did how to raise the dead, and he said so.

"If I had any excuse to go to our banks—but it's no use," said Mills, "I believe they'd let us have \$100,000 on our paper. We can unload the stock on hand at a sacrifice and raise a few thousand—just enough to prolong the agony."

When John Mills went home that night he told his wife, and she knew it.

"You look worried, John," she said to him after dinner and when the children had gone to bed. "Is it business?"

"No, dear, business is looking up every day. Reports from the West and South are fine. Men & Co. can hardly give their stuff away. They are losing money today on every yard of cloth they make."

And John Mills excused this to himself by saying that it was enough for the family to worry, and that a knowledge of the true state of affairs could do no possible good.

But the wife did not think so and she did worry. She knew what was needed at the mill, and she knew that it would take a great deal of money to do it. She knew that the banks had plenty of money, and that if they were sure of repayment they would be very glad to loan it. She knew, too, that if the business of the firm was prosperous that their simple notes would be sufficient.

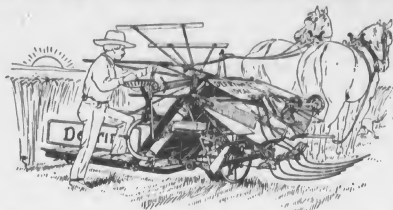

It was late the next afternoon when an idea came to her. It was startling, audacious, and with a mammoth lie for foundation. But why not try it? It was her life or her good and would do no harm? He had lied to her for her good, so he thought, and now she would lie to him for his good—for their mutual good.

It was true.

When John Mills came home that

This is no idle boast. You know me and you know I mean just what I say. Come in and let me show you my stock. I have everything you need on the farm at the lowest price possible for first class goods. Don't buy until you see my stock and get my prices.

J. W. PATE, : McQuady, Ky.

Slight, more tired, worn and discouraged than ever before, his wife met him, radiant with happy excitement. She went with him into his study and shut the door. Taking his hand in hers and sitting near him she said:

"John, I have some good news for you. You remember that I told you once about that mine in Idaho that father and Uncle Joshua bought and that never panned out? Well, I had a letter from Uncle Joshua this morning, and he has sold the mine to an English syndicate for \$80,000. It seems that they struck the vein about a year ago, and some Englishmen got wind of it and formed a company to buy it. The trade has just been made, and my share is \$20,000. I am to have the first \$100,000 in about two months and the balance in lots of the year. Uncle Joshua says the entire purchase price is guaranteed by the Rothschilds, and that the first \$100,000 has already been paid to him, but that he has been obliged to use the most of it to clear off some mortgages and pay the commission and expenses of the sale."

The future was clear to John Mills now. Three hundred thousand dollars, even in prospect, gave a man great moral courage. He would go the banks to-morrow and tell them he wanted \$100,000, and that his wife, who had just come into a fortune, would call for \$20,000 of the \$100,000. He would put in new machinery, get rid of all his old stock, send out his salesmen with new samples at once—and knock overboard spots out of Mills & Son.

And it being true that all finance is based on confidence, and as Mr. John Mills looked and acted the millionaire that morning when he called on the president of his two banks, it was just forty-eight hours when he had to his credit \$100,000, less four months' discount, and in less than forty-eight hours thereafter he had placed the orders for new machinery, had set his sample looms at work on new designs, and had arranged to unload the stock on hand at a price to shock and disgust Mills & Co.

When those notes came due \$25,000 was paid on them, and the banks were both to take it, as the preferred the full \$100,000 of such A1 paper. In less than a year the whole \$100,000 was wiped out, and Mills & Co. were laying the foundation for a new mill twice as large as the old.

But that lie of the little wife! Well, she had to tell her husband, but not until the mill was running full time with the new machinery and the day after she received the letter:

From John Brown to Mrs. John Mills:  
SAN FRANCISCO, May 28, 1896.

My Dear Jennie—I have sold that old mine your father and I bought together so many years ago. I've had to take it out of my hands, but the good news is that as they come due I'll send you the cash. You'll get about \$50,000 out of it, as well as the

**CHICKEN SALAD.**

Sparking of chickens, said Wick Dehaven, at Vest's the other night, "there's no more sagacious folk on earth."

A few years ago a Methodist district conference was to be held at Hardinsburg and it was thought that all the ministers in the country for miles around would be present.

Great preparations for their entertainment were being made and the new and the most beautiful in the poultry yards. A convention was held among the chickens and a few days before the conference took place.

making a trip on the train. The engineer and myself were paralyzed with astonishment to find the railroad track for miles outside of Hardinsburg, lined with chickens of every age and variety.

They were migrating in the direction of Gloucestershire where they felt they would be safe.

Ed Johnson, who lives on S. T. Elder's place, near Chumney, has a horse that is a curiosity in its way.

It has an appetite for chickens and whenever it has an opportunity it dines on the feathered bipeds. It is reported to eat chickens more than one and catches them when they are running about in the yard.

It is a very cunning old horse and when it eats corn scatters some of the kernels at its feet to tempt the chickens to the place to eat. While they are busy picking up the grain he will suddenly catch one between his teeth and proceed to eat it with great gusto.

He cannot be broken of his bad habit.

When a hen takes it into her giddy old head to do something out of the ordinary, she generally succeeds.

Mrs. Richard Carter, who lives near town, has a hen that up to Saturday was distinguished for nothing except her scratching propensities.

The other day she determined to do something to entitle her to be written up in the Harpers' Weekly and thus achieve world wide fame.

The easiest way for her to do this was to lay an egg that would be unlike any other egg, and she succeeded.

Mrs. Carter brought into this office, Saturday, an egg about an inch and a half long that was shaped like a gourd.

In reality it was two eggs, the head of the egg being perfectly shaped and about the size of a strawberry.

The egg is on exhibition in the News office.

Deafness is caused by an inflamed condition of the mucous membrane of the Eustachian Tube. When this tube gets inflamed you have a running sound or imperfect hearing, and when it is inflamed closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever.

Yours out of ear, or even cured by ear, which is nothing but an inflamed condition of the mucous surface.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by HALL'S CATARRH CURE. Send for circular, free.

Strong words of indorsement for Peruna, and for the manufacturers of Peruna, from prominent officials of its home city.

Hon. Samuel L. Black, Mayor of Columbus, O., whose picture adorns this paragraph, writes the following letter:

EXECUTIVE DEPT., CITY OF COLUMBUS.  
To whom it may concern:  
I must cheerfully recommend Peruna as one of the very greatest possible benefits to man of earth and other diseases of the human system.

This remedy has established itself in the minds of the people as the greatest possible benefit to man and his system. I have known Dr. Hartman for a number of years, and am pleased to say that he is one of the leading physicians of this city, a man of the very highest standing and character in the community.

Respectfully, SAMUEL L. BLACK.  
Col. Arthur L. Hamilton, commanding officer of the Seventeenth Infantry Ohio National Guard, whose residence is at 309 West First Avenue, Columbus, O., bears witness to the efficiency of Peruna. Here is Colonel Hamilton's letter and picture.

COLUMBUS, O., May 18, 1897.  
Dr. S. R. Hartman.  
Dear Sir:—Having heard the merits of Peruna so fully demonstrated in my family, I have a number of friends who have taken it for catarrh and other troubles, and all with it in praising it. As a remedy for summer and winter troubles I can fully recommend it.

ARTHUR L. HAMILTON.  
From the Hon. Samuel J. Swartz, Police Judge, Columbus, O.

STATE OF OHIO,  
SUPREME COURT LAW LIBRARY,  
COLUMBUS, O., Nov. 15, 1897.  
Gentlemen:—The result of using Peruna has been so gratifying to me that I cannot but congratulate you on the success of your remedy. You stand in the business community, and expect a merited endorsement, prepared me the worth of the gentleman conducting this great enterprise, prepared me the worth of the gentleman conducting this great enterprise, prepared me the worth of the gentleman conducting this great enterprise.

The rebellion of savage Africa makes an abductor, and fills us with disgust. Yet we have statues of our own, one of them great, widely worshipped, and in whose name crimes innumerable are daily perpetrated. The name of that false is *Zeus*. To that powerful deity, thousands of mothers annually make sacrifice of their daughters. For what is it but a sacrifice to the false, ignorance to permit girls to blossom to womanhood, and enter the marriage relation without the help of the obligations of that relation and its physical part?

Just the word which the mother fails to speak would turn the young girl's attention to the danger of irregularity. For it is in the ignorance of the necessity for regularity in the periods that this is the cause for the debilitating drains, the female weakness, bearing-down pains, inflammation and ulceration that rob marriage of joy and motherhood of happiness.

That "Good seed for women" advertisement, which has named Dr. Pierce's Favorite Prescription, establishes regularity of the periods, drives up all unhealthy drains, cures female disease, and inflammation and ulceration of the peculiarly feminine organs.

Women suffering from diseases peculiarly feminine, may consult Dr. R. V. Pierce, by letter at the Invalid Hotel, Buffalo, absolutely without charge or fee. Back letter is opened in strict privacy, read as secretly confidential and to preserve the seal of all unbecoming letters, all replies are sent in plain envelopes, bearing no single word of printed matter.

The ladies of the town are to be congratulated for their successful effort in raising of a petition asking the board of trustees to not grant saloon license for the following year, which petition was presented and request granted the 25th. So after September, thanks to those noble women, we will have a dry town for at least two months.

The good citizens who refused to sign the "liquor petition" because whiskey was not bothering them, probably didn't think of their sons, grandsons, and great-grandsons, who might in the future be tempted, cursed and ruined, by the vile traffic, and for those reasons set our hands and hearts afloat, and under all circumstances, be raised against the demon that grows in our midst, and pollutes and demoralizes our community, and on the other hand some say that "the saloon" will not stay in this town, and the man who is getting old in the sin of drink. But after doing what we can, let us be boys and young men, who are young in their appetites and those who have never been tempted. What of them? Shall we keep the grog shop in our midst to allure them and ruin their lives, because the removal of it will do the other ones no good. Nay, verily, their race is almost run. Our boys we would save. We have older men that have the manhood and strength to say no, that only drink when tempted, what of them? God be praised for this move, and may this be only a beginning of better things for the uplifting and salvation of our boys and young men.

Quite a number of ladies, friends and relatives, were invited to spend the day, Tuesday, April 25, with Mrs. Clara Drury and Jolly her new carpet rag. They assembled early and worked well. Miss Clara Drury won the prize for sewing most balls. The dinner was perfect, and was served by Mrs. Drury and Miss Lena in their best style. Every body seemed in good spirits and, doubtless hope for many happy returns of the pleasant day.

There are several residences in our vicinity well worthy of a place among the illustrations of lovely homes in the "Ladies Home Journal." In the last of these we find "Fair Lawn" the home of the Hon. Cass. Blanford. With such a beautiful home and no lack of the best things of this, political honors crowd him for those at last are but transient and always accompanied with bickerings and envy, but the pleasures of a quiet, beautiful rural home are pure and lasting.

Flattering reports reach me of the success of the Farmers' Institute at Irvington. Editor Goodnight was there representing the News and made an interesting address on the relation of our country paper to the farming community, showing it to be the closest and friendliest. He also said that the columns of the News were always open to the farmer. His address was well received and he will tell you what everybody else said.

Speaking after the loss of the school census, the robin and the wren, and the blue jay have come; the season of sweet-scented buds and blossoms, and its delightful, busy, dreamy atmosphere, is here and, though we have to toil long days through for that which sustains our mortal existence, still we may with glad and happy hearts fairly revel in beauty and joyances.

**Remarkable Rescue.**  
Mrs. Michael Curtin, Plainfield, Ill., makes the statement, that she caught cold, which settled on her lungs; she was treated for a month by a family physician, but grew worse. He told her that she was a hopeless victim of consumption and that no medicine could cure her. Her druggist suggested Dr. King's New Discovery for Consumption; she bought a bottle and to her delight found herself benefited from first dose. She continued its use and after taking six bottles, found herself sound and well; now does her own housework and is as well as she ever was. Free trial bottles of this Great Discovery at Short & Haynes' Drug Store. Large bottles 50 cents per \$1.00.

Buried These Lusty Negroes Out of Sight

But They Escaped With But Slight Injuries.

What was a most miraculous escape from death occurred Thursday at the "Treat" gravel pits below Harpersville. Two negroes, Milton Vester, of Henderson, and Anderson Stephens, of Louisville, were carelessly undermining a huge bank of gravel. Suddenly the mass fell in on them but they were quickly extricated by their comrades. They sustained comparatively slight injuries, although they were painfully bruised and sprained. They were brought to this city and were attended to by Dr. Simons.

Many a fair young child, whose father has passed the mother, until she suspected rightly her darling was troubled with worms, has received the cure here from a bottle of WHITE'S CREAM VERMIFUGE. Price 25c—A. R. Fisher.

### PAYS NATURE'S DEBT.

Cal Basham Succumbs After an Hour's Illness.

The Bewleyville neighborhood and practically the entire county was shocked at the sudden death of Cal Basham last Friday night.

The circumstance preceding his death were peculiarly saddening. On Friday night a heavy rain storm passed in the neighborhood of Mr. Basham's home, and when it was over he went out into the yard and picked up some of the stones.

When he came in he was in a chair and complained of feeling cold. Blankets were procured and wrapped about him. After an hour's illness he died. He was buried early Sunday morning at the Willis Hardin cemetery. He was one of the best known men in the Bewleyville section and the sad event has cast a gloom over the whole neighborhood.

### DEATH OF MRS. TABELING.

Recalls a Tragic Accident to Her Husband.

Mrs. Angeline Tabeting, a sister of Ansel and Alfred Goff, of this city, died Sunday, April 30th, at her home near Fort York. Her husband was killed three years ago by being caught between a tree and a wagon loaded with hay. The hub of the vehicle practically cut him in two. Mrs. Tabeting was compelled to raise a large family, which she did by hard work and economy.

### DEWEY AND SCHLEY.

Patriotic John Husselman Names His Twins.

John Husselman, Irvington, is a patriotic, every inch of him and claims that red, white and blue run through his veins. On April 26th, his fifty-sixth birthday, his wife presented him with twins, a boy and a girl, and he promptly named Dewey and Schley.

### WILL GO DRY.

Stephensport Women Have Knocked Out the Liquor.

The ladies of Stephensport put on their war paint recently and went on the trail of John Barleycorn, determined to have his scalp. They got up a petition against the granting of saloons in the city and succeeded. The town will go dry in September. Cloverport is now the only place in the county where liquor can be legally sold.

### COLONEL HASWELL.

Goes With the Governor to Chickamauga Battlefield.

Col. John P. Haswell, Hardinsburg, as commander of the 10th Kentucky, accompanied the party on the special train Tuesday morning for Chickamauga battlefield where Kentucky's monument to her Federal and Confederate dead is to be dedicated. The monument will be unveiled by Miss Christine Bradley, the governor's daughter. It is the only one of the kind in the country. About 250 citizens went on the trip.

### Took Water.

Commonsense (T. N.) has a beautiful capita launch, the "Marguerite" took water Saturday. She was launched without trouble. On Sunday morning Commodore Skilman, accompanied by Judge James Skilman and Leon McGavock landed the Marguerite and set off on a cruise to Brandenburg. They are expected home Wednesday.

### Birthday Party.

The little Miss Mattingly, Bertha and Anna May, tendered their friends a birthday party Saturday. The feature was a peanut bout. Margaret Norman won first prize a bonus finger, and Mary Joliet got the booty prize, a "little nigger" in a peanut shell.

### A Sad Misalliance.

Joe Harpole, machinist at the shop, was summoned by telegram, Tuesday morning, to his home at Bowling Green, on account of his father, whose life is despaired of.

### Will Locate Here.

Dr. R. F. Hawley, New Albany, Ind., will locate in this city and will practice medicine with his brother, Dr. B. T. Hawley.

### Services at Victoria.

Father Day, of this city, will say mass at Victoria next Thursday. A full attendance is desired.

## THE THINGS WE'LL SEE

When the Little Red Wagons Come to Town.

Circus They Will be a Great One For "Hey Rub!"

The little boys and girls and the big ones, too, are eagerly awaiting the coming of the circus.

Friday, May 5, is a day that is pointed around town on bill boards, dead walls, and in show windows in big red letters. In fact a red letter day, a red letter day.

Already the little boys and girls are preparing to run away with the circus and the best girls to soda pop, striped candy, toy balloons and they will see the elephant in all her glory. The elephant in this show is a real elephant and she has a baby.

A circus without a living skeleton, a tattooed man and a snake charmer wouldn't be a circus.

The little boy and his sister are already playing circus and almost every day you can see the little boy doing acrobatics on the limb of an apple tree just like a real circus man.

The old lady will have to make frantic efforts to keep them at home.

The boys in town and on the farm are saving their money to obtain admission to the big show. They want to see the elephant in all her glory. The elephant in this show is a real elephant and she has a baby.

The boys will feed the elephant with peanuts and they will treat themselves and the best girls to soda pop, striped candy, toy balloons and they will see the elephant in all her glory. The elephant in this show is a real elephant and she has a baby.

Of course as grown folks are tired of seeing circuses and we don't want to go. When the little red wagons appear, however, we will revivify that the children will see the clown and the Steadman ponies, and we will have to go with them to see that the little money in the strong iron cage do not eat them up.

HARDINSBURG.

Mrs. Will Lennis is visiting at Stephensport.

Richard Hays and family have moved here from Louisville.

Haynes, Jim Pace, Frank Payne and

the other heavy weights in the city will try to knock ball Columbia out of the machine. They are all strong men and will give astonishing feats of strength. The man in this picture is John Pison. What they will do in the circus grounds will be a puzzle.

Of course everybody who has a dima to spend will go to the side show and see the snake charmer. It's a time honored custom and what he does with the serpents would give the Mother Eve the shivers.

## SWAPPED IDEAS.

(Continued from First Page.)

but has the reputation of being one of the very best farmers in the Kentucky and certainly grows crops of wheat that are large enough to justify his being an authority on the subject.

Clover land is his favorite and he begins to prepare his seed bed early, breaking the land in July or August. After considerable experimenting he has come to the conclusion that he gets better results by using 100 pounds of fertilizer to the acre. If the land is cloudy or runs together he sows a clover harrow. He runs a drag over the surface and harrows it until it is perfectly mellow to a depth of three inches. He thinks that breaking the land five inches is deep enough. He uses a smoothing harrow with small, sharp teeth which he harrows in spring, although he has done the latter without success.

Sheep for Profit.

John R. Wimp made a splendid talk on this subject. He owns sixty ewes and has fifty old lambs, and believes he makes more off of sheep for the money invested than on any other thing.

Sheep require lots of territory and a constant change of pasture. The ewes should not be highly fed, but with lambs it must be just the reverse. The latter will learn to eat bran in four weeks, and forty of them will eat a half bushel of meal and bran daily. The Southdown lamb is the favorite for mutton.

They can be learned to eat by fastening them in barns and by putting the bran in their mouths. They should be fed right up to all winter. His lambs gained forty pounds from May 1st to June 1st.

Sheep eat a pasture closer than cattle, and they require good judgment in pasturing. There are eighteen cents paid for the keep of the ewe, and the lamb at five cents per pound will be all profit.

Feeding Cattle for Profit.

This part of the talk was handled by Thomas Lydden. He is a young man and is one that Breckinridge county should be proud of as he is one of the most successful cattle feeders in the county.

He said he commenced last season with high grade cattle and his sales in October and fed the animals with bran, ensilage, cut fodder, corn nibbles. With this class of feed several of his cows gained from 100 to 150 pounds in 57 days. He then began to feed cotton seed meal giving the animals, with their other feed about 2 pounds daily, and on December 20th increased it to five pounds and fed this ration until February. He succeeded in adding 320 pounds, on an average to each animal.

He believes ensilage to be a fine cattle feed and can carry twice as many animals as he could without it. He says the nutrient value of cotton seed meal is about twice as good as corn.

Values of Certain Foods.

The Kentucky Cattle Club poster was never put to a better use than at that meeting. Dr. P. W. Foote used it for the purpose of printing a table describing the nutrient and material value of certain food products and with his permission we will give it in detail next week.

Other Talks.

Mr. Cunningham, of Concordia, a well known fruit grower and distiller, talked on apple culture. He favored Ben Davis, though he has been successful with Rome Beauties. Fencing trees when young on this land, and a tendency to retard the growth of trees and unwise. He fertilizes his trees and sprays them. His solution for spraying is 4 pounds of sulphur, 4 pounds of lime and one ounce of Paris green to 45 or 50 gallons of water.

Ed Goodnight of the Breckinridge News, spoke on the relation of the newspaper to the farmer and endorsed the use of the News' columns to the farming interests of the county.

Will McFarly at Cloverport.

Before the close of the meeting it was announced that the next meeting will be held at Cloverport sometime in August.

ADDITIONAL LOCAL.
